## Revision History

| Version | Author                | Date       | Change                                                                                                                                                                             |
|---------|-----------------------|------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| v2.1    | Louis Liu             | 2023/02/15 | 1 <sup>st</sup> edition                                                                                                                                                            |
| v2.1b   | Louis Liu             | 2023/03/05 | 2 <sup>nd</sup> edition, 2 attendees share 1 EdgeIPS                                                                                                                               |
| v2.1c   | Louis Liu             | 2023/04/18 | 3 <sup>rd</sup> edition. Added Edge Lab 8: EdgeFire NAT settings                                                                                                                   |
| v2.2c   | Louis Liu             | 2023/05/15 | Using Portable Inspector with Management Program                                                                                                                                   |
| v2.2c   | Chris Van Den Abbeele | 2023/06/04 | Minor cosmetic updates                                                                                                                                                             |
| v2.3    | Louis Liu             | 2023/06/05 | <ul style="list-style-type: none"> <li>- EdgeOne Installation &amp; Configuration</li> <li>- EdgeIPS 103 Installation &amp; Configuration</li> <li>- Portable Inspector</li> </ul> |
| v2.4    | Louis Liu             | 2023/06/13 | Split lab guide by solutions based on v2.3                                                                                                                                         |
| v2.5    | Louis Liu             | 2023/08/31 | Support ElementOne 1.3.0                                                                                                                                                           |
| v2.5b   | Chris Van Den Abbeele | 2023/09/07 | Minor cosmetic updates                                                                                                                                                             |
| v2.6    | Louis Liu             | 2023/11/02 | Support ElementOne firmware upgrade                                                                                                                                                |
| V3.0    | Louis Liu             | 2024/04/07 | Consolidate Win7 VM                                                                                                                                                                |
| V3.1    | Chris Van Den Abbeele | 2024/04/15 | Updates and fixes                                                                                                                                                                  |
| V3.1    | Louis Liu             | 2024/12/24 | Support ElementOne 1.10.x and above                                                                                                                                                |
| V3.2    | Chris Van Den Abbeele | 2025/01/29 | Revised for improved phrasing                                                                                                                                                      |
| V3.3    | Louis Liu             | 2025/07/03 | Update for ElementOne 1.20.0                                                                                                                                                       |
| V3.4    | Louis Liu             | 2026/01/29 | Update for ElementOne 1.23.2                                                                                                                                                       |
| V3.5    | Louis Liu             | 2026/02/09 | Update for ElementOne 1.27.x                                                                                                                                                       |

## Product Versions

| Solutions          | Edition            |
|--------------------|--------------------|
| ElementOne         | 1.12.2 and above   |
| Portable Inspector | 1.0.1054 and above |

| 2   | VMWare Workstation Pro 16 | Hypervisor<br>Minimum Hardware level = 16 |                                    |                    |                                     |

## 2.3 Lab network architecture

### Basic Implementation Training Lab Network Architecture

**Figure 1 Lab network architecture**

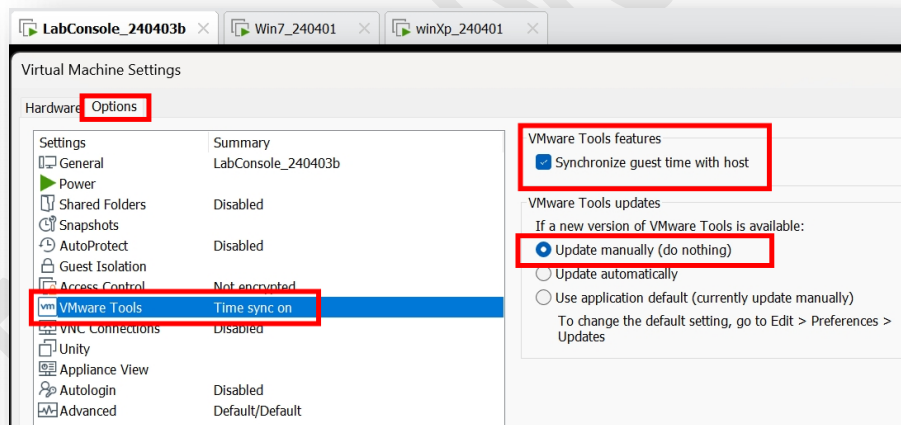

## 2.4 Credentials

**Table 4 Lab Credentials**

| No | VM Image          | IP             | Account / Password                           |
|----|-------------------|----------------|----------------------------------------------|
| 1  | LabConsole        | 192.168.23.196 | txone/12345678                               |
| 2  | ElementOne-vx.x.x | 192.168.23.18  | Server: root/12345678<br>web: admin/12345678 |
| 3  | Win7              | 192.168.23.24  | txone/12345678                               |

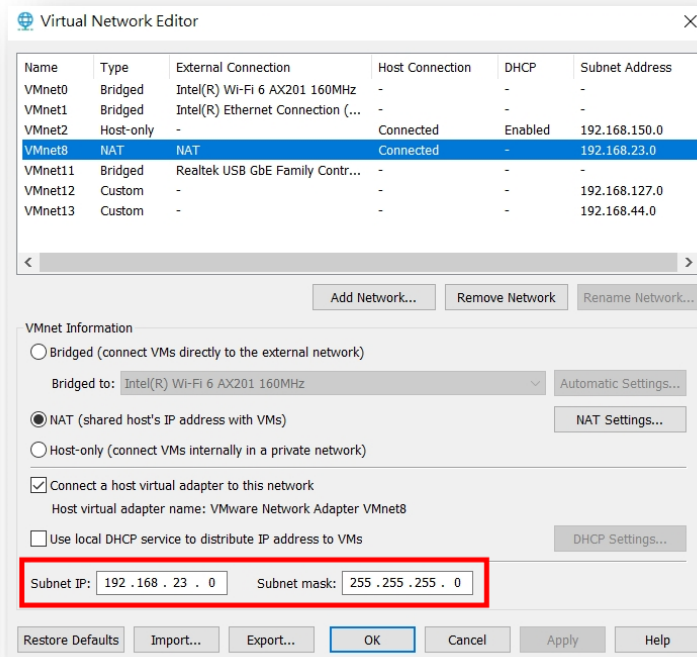

## 2.5 VMWare VMTools update Settings

- Edit the Settings of each VM
- Choose the **Options** tab
- Select the **VMWare Tools** option
- Check **“Synchronize guest time with host”**
- Under VM Tools updates, select the option **“Update manually (do nothing)”**

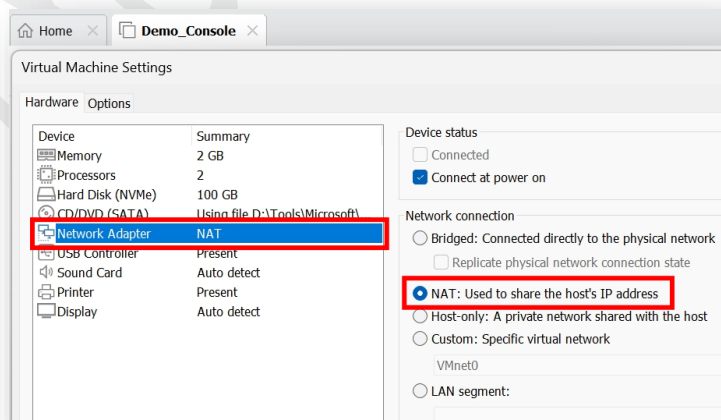

## 2.6 VMWare virtual Network Settings

- Make sure your laptop can access the Internet via its wireless interface or UTP network interface.
- In VMware workstation, open the Virtual Network Editor and configure the VMWare NAT network to 192.168.23.0 /24.

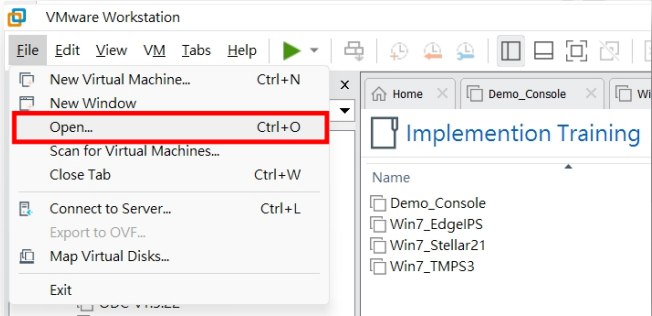

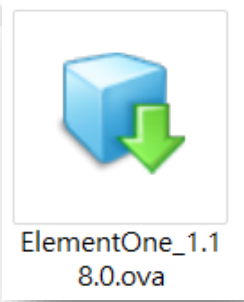

- In the Settings of the LabConsole VM, switch Network Adapter to NAT.
  - Default setting of NAT default gateway is **192.168.23.2**
  - LabConsole, StellarOne and EdgeOne use **8.8.8.8** as DNS server.

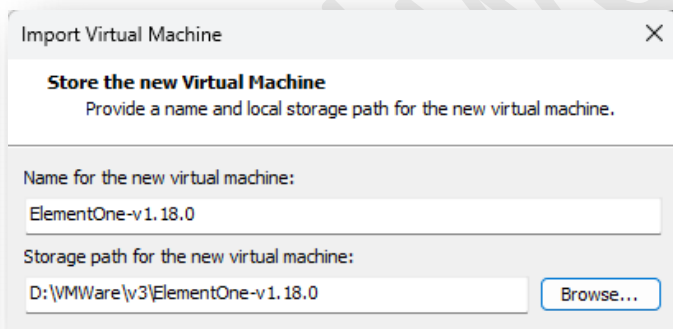

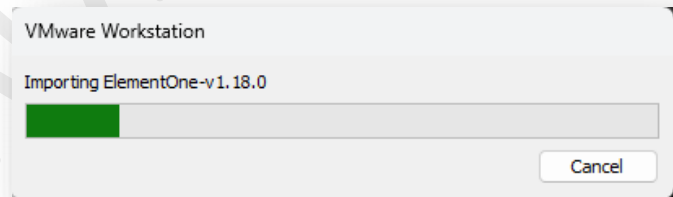

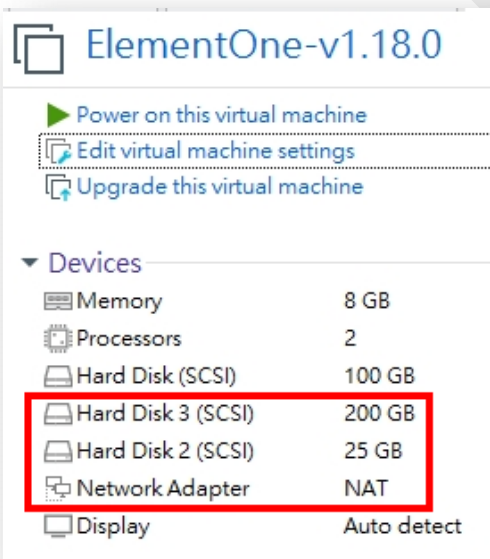

### 3. Labs

#### Lab1: ElementOne Deployment

**Table 5 ElementOne Deployment**

| Items | Descriptions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|       | <p><b>Notes:</b></p> <p>If you are using <b>OneDrive</b> on your host, ensure that the storage path of the VM is not a directory that is synchronized with OneDrive. Every time the OneDrive agent syncs with the server, it can disrupt the integrity of the virtual machine, leading to numerous errors in the ElementOne CLI.</p> <p>For this lab, it is <b>not recommended to use an EXTERNAL harddisk</b> to host the VMware images. The slow I/O may cause the ElementOne database initialization process to fail and could also lead to VMware image corruption during runtime.</p>  <p>4. The ElementOne OVA image import process will take a moment.</p>  <p>5. After the OVA image import has completed. Add a <b>2<sup>nd</sup> hard drive</b> for Data Disk and a <b>3<sup>rd</sup></b> hard drive for Element Connect to the ElementOne virtual machine. Allocate at least <b>25GB</b> for 2<sup>nd</sup> hard drive (SCSI Disk type) and</p> |

| Items | Descriptions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|       | <p><b>200GB</b> for 3<sup>rd</sup> hard drive (SCSI Disk type). Do not worry if you do not have that space on your laptop. This hard disk is “<b>thin provisioned</b>”. This means it will only consume the space that it needs, but it needs to be configured to minimum 20GB for data disk. We recommend to set it to 25GB for good measure.</p>  <p><b>ElementOne Network configuration</b></p> <ol style="list-style-type: none"> <li>Make sure your VMWare Network Adapter is set to <b>NAT</b></li> </ol> <p>Turn on the ElementOne virtual machine. When ElementOne is powered-on for the first time with a new data disk, it may take about <b>2 minutes</b> to initialize the data disk. After 2 minutes, the login prompt will appear.</p> <p>Log in to the ElementOne Vshell console using the following credentials.</p> <p><b>User: root</b></p> <p><b>Password: txone</b></p> |

|          | <div><p>The screenshot shows the 'Portable Inspector' window with the 'Scanning Tool' tab selected. At the top, there are buttons for 'Scan', 'Restore', 'Logs', and 'Status &amp; Update'. Below these are 'Import Logs', 'Export All', and 'Delete All' buttons. The 'Delete All' button is highlighted with a red rectangle. Below the buttons is a table with columns: Date, Time, Computer, Threat, Comment, and Scan Type. The table contains three rows of scan data.</p><table><tr><th>Date</th><th>Time</th><th>Computer</th><th>Threat</th><th>Comment</th><th>Scan Type</th></tr><tr><td>2/9/2026</td><td>8:57:39 AM</td><td>WIN7</td><td>2</td><td>Partially fixed</td><td>OS Scan</td></tr><tr><td></td><td>8:58:32 AM</td><td>WIN7</td><td>2</td><td>Fixed all</td><td>OS Scan</td></tr><tr><td></td><td>9:07:55 AM</td><td>WIN7</td><td>0</td><td>No threats found</td><td>OS Scan</td></tr></table></div> <p>5. Click “Yes” to confirm the deletion of all logs in Portable Inspector.</p> <div><p>The dialog box asks: 'Are you sure that you want to delete all of the log data?'. It has 'Yes' and 'No' buttons. The 'Yes' button is highlighted with a red rectangle.</p></div> <p>6. Close the Scanning Tool console.</p> <div><p>The screenshot shows the 'Portable Inspector' window. The close button (X) in the top right corner of the window title bar is highlighted with a red rectangle.</p></div> <p><b>IMPORTANT:</b></p> <p>You <b>MUST</b> first close the Scanning Tool console. Then Safely Remove the Portable Inspector from the VM <b>Win7</b>.</p> | Date     | Time   | Computer         | Threat    | Comment | Scan Type | 2/9/2026 | 8:57:39 AM | WIN7 | 2 | Partially fixed | OS Scan |  | 8:58:32 AM | WIN7 | 2 | Fixed all | OS Scan |  | 9:07:55 AM | WIN7 | 0 | No threats found | OS Scan |

## 4. Appendix

### 4.1 How to transfer files to the Win7 VM

- Log in to the VM **LabConsole**
- Drag and drop the file that you want to transfer to the **“Training”** folder on the desktop. i.e. **“Anydesk.exe”**

- Run the **hfs.exe** from the **Tools** folder under **Training** folder

- Log in to the VM **Win7**
- Open Internet explorer and click “HFS-Training” from the bookmark. Or go to <https://192.168.23.196/Training> . Here you can download files from the **LabConsole**
