

TXOne Release Notes - Firmware

Product Type	Deployment Assistant	Release Date	2025/10/15
1. Release Version • Firmware Name: TXOne_DA_1.3.2 • Version: TXOne_DA_1.3.2 • MD5 Checksum: a1d7b74e9d20d95af7889881e0d94827 • SHA256 Checksum: be1f2f9850c55b86e930812d0baa28988ab6ed3598b9dd8bb636977d711347d6			
2. Minimum System Requirements • Operating System: ○ Windows 10 or 11 (64-bit only) • Display Resolution: ○ 1366x768			
3. Network Switch Compatibility • Please refer to the Deployment Assistant application note for details.			
4. Release Info • Supported Devices ○ EdgeIPS v2.0.13 or later ○ EdgeIPS Pro v2.0.10 or later ○ EdgeIPS LE v2.0.5 or later ○ EdgeFire v2.0.16 or later • New Features ○ Added new event notification options for SNMP Trap Receivers. • Enhancements ○ N/A • Bugs Fixed ○ N/A • Known Issues ○ Deployment Assistant fails to save and implement the user's configuration data if the SNMP port and the default device HTTPS port (443) are the same. As a workaround, the user should configure the SNMP port to another port. ○ If the user modifies the Syslog profile of an Edge device (firmware version 2.0) in Deployment Assistant and then opens the [Edit Syslog Settings] window for the modified profile on the Edge device web console without making any changes, an error message will appear after the user clicks [Save].
