

Portable Inspector Release Note

Version 1.0.1098

Release date: 2026-04-30

Detail

New Features

1. Added asset collection controls and auto-start enhancements for Portable Inspector in OS Scan, available when managed by ElementOne and configurable through ElementOne or the Scanning Tool. (Supported from ElementOne 1.29.0)
 - Added a Collect Asset Info button to manually start asset collection.
 - Added an option to enable or disable asset collection during scanning.
 - Enhanced Auto Start settings to allow Portable Inspector to automatically start scanning or collecting asset information after launch, with a configurable countdown.

Note: In Management Program mode, these settings are not available in the Management Program and can only be configured on the Scanning Tool.

Enhancements

1. Extended support for scan alerts and restrictions configured in ElementOne to Linux, enabling alerts to be shown or scans to be restricted when antivirus patterns are outdated beyond a configurable period. (Supported from ElementOne 1.29.0)

Bugfix

1. Fixed vulnerability CVE-2023-32763.

Version 1.0.1096

Release date: 2026-04-15

Detail

Enhancements

1. Added support for identifying and displaying Windows LTSC (Long-Term Servicing Channel) in the OS description of scan logs.

Bugfix

1. Fixed an issue where the "Fixed" count, representing the number of threats cleaned by Portable Inspector, was displayed incorrectly in the Malware Scan Result section of the Equipment Security Inspection Report for Rescue Disk scans.
 2. Fixed an issue where log synchronization with ElementOne failed during Secure File Transfer from Safe Port to Portable Inspector when threats were detected and blocked by Portable Inspector.
 3. Fixed an issue where the Help links in the Scanning Tool Agent and Management Program were unavailable and now correctly link to the TXOne official documentation page.
-

Version 1.0.1094

Release date: 2026-01-30

Detail

Important Information

1. If you upgrade Portable Inspector to version 1.0.1094 before upgrading ElementOne, be sure to upgrade ElementOne to version 1.27.0 or later to ensure compatibility and proper operation of asset-centric features, pattern updates, and log uploads.

New Features

1. Added the Secure Distribute feature, allowing users to securely distribute files to Portable Inspector devices through ElementOne with malware scanning and centralized management to ensure safe and controlled file delivery. (Supported from ElementOne 1.23.2)
2. Added support for the asset-centric feature, enabling historical asset records to be retained and ensuring that the configured asset identification rule is consistently reflected in Logs and Reports. (Supported from ElementOne 1.27.0)
3. Added support for scan alerts and scan restrictions configured through ElementOne, allowing administrators to display alerts or restrict Portable Inspector scans when the antivirus pattern has been outdated beyond a configurable time period. (Supported from ElementOne 1.27.0)

Enhancements

1. Added Korean language support for the Equipment Security Inspection Report.
2. Renamed the option label from "Enable CVE detection" to "Enable exploit detection" for a clearer description.

Bugfix

1. Fixed an issue to allow non-admin users to read Portable Inspector debug logs collected from Safe Port.
 2. Fixed vulnerabilities CVE-2009-0901, CVE-2009-2493, CVE-2009-2495, CVE-2018-25032, CVE-2025-0665 and BDSA-2024-0319.
-

Version 1.0.1070

Release date: 2025-10-31

Detail

New Features

1. Added Secure File Transfer functionality, allowing customers to use Safe Port to store files from general USB drives into Portable Inspector Pro. (Supported from Safe Port 1.0.1046)

Bugfix

1. Added a TXOne signature to prevent some CA certificate files from being incorrectly marked as untrusted.
 2. Fixed an issue that was triggered when the Secure Storage user interface was maximized or minimized.
-

Version 1.0.1068

Release date: 2025-09-02

Detail

Bugfix

1. Fixed an issue where the Scanning Tool lost the corporate identity logo in scan reports after syncing with ElementOne an even number of times when the logo in ElementOne had not been updated.
-

Version 1.0.1066

Release date: 2025-08-29

Detail

New Features

1. Enabled users to change the device name from the Scanning Tool managed by ElementOne when naming is controlled by Portable Inspector.
2. Added an option to include or exclude asset information when exporting the Equipment Security Inspection Report.
3. Enabled the Equipment Security Inspection Report to display the corporate identity logo synced from ElementOne.

Bugfix

1. Fixed Unquoted Service Path Vulnerability in STAgent.
 2. Fixed an issue where Rescue Disk scan logs were lost when syncing to Management Program or ElementOne without launching the Scanning Tool.
 3. Fixed CVE-2022-25634, CVE-2025-4211, and CVE-2020-24742 vulnerabilities.
-

Version 1.0.1054

Release date: 2025-04-02

Detail

New Features

1. Added support to set the Asset Name in the Scanning Tool's scan result window after a scan is complete.

Bugfix

1. Fixed an issue that prevented Linux LVM file systems from being properly mounted in Rescue Disk.
2. Fixed an issue where the USB device reset process could remain incomplete.

Enhancements

1. Replaced "Scanner Version" field with "PI Version" in the Equipment Security Inspection Report.
 2. Increased launch timeout of Scanning Tool to prevent startup issues caused by system performance.
-

Version 1.0.1050

Release date: 2025-02-10

Detail

New Features

1. User access to Secure Storage on Linux platform.

Bugfix

1. "Meta Data" column heading in the CSV export file generated by Management Program is now correctly written in Japanese.
2. Fixed the discrepancy in Rescue Disk scan time between Windows and Linux versions.
3. Upgraded Porteus to version 5.01 to resolve the UI-not-full-screen issue.

Performance enhancement

1. Shorter loading time of Management Program.
-

Version 1.0.1044

Release date: 2024-12-30

Detail

New Features

1. Fixed CVE-2024-47934 Vulnerability: Improper Input Validation in Portable Inspector Management Program.
-

Version 1.0.1042

Release date: 2024-10-23

Detail

New Features

1. UI enhancement:

- 1.1 Added Minimize button to the Secure Storage file transfer Processing window.

2. Added support for additional Linux platforms:

- Rocky Linux 8.10/9.4
 - Alma Linux 8.10/9.4
 - Miracle Linux 8.6/9.2
-

Version 1.0.1040

Release date: 2024-10-18

Detail

We sincerely apologize for the unexpected removal of Portable Inspector 1.0.1040 without prior notice. This decision was made due to a corruption issue in the 1.0.1040 build. To ensure the best user experience and maintain security, we expedited the release of Portable Inspector 1.0.1042. We deeply regret any inconvenience caused and appreciate your understanding. Please refrain from upgrading your Portable Inspector to version 1.0.1040.

Version 1.0.1038

Release date: 2024-09-23

Detail

New Features

1. Scanning Tool:

- 1.1 Expanded the Malware Free Report to include asset info and renamed it as the Equipment Security Report.
- 1.2 Resolved the AU server certificate verification failure that occurred before any changes were made to the Scanning Tool's Update Source.

2. Management Program

- 2.1 Fixed the issue with non-ASCII character support in Management Program's exclusion list.

3. ST Agent:

- 3.1 Fixed the issue with missing debug logs during collection using the ST Agent diagnostic tool.

Version 1.0.1036

Release date: 2024-07-04

Detail

New Features

1. Scanning Tool:

- 1.1 Added support for the TXOne license add-on.
- 1.2 Wrong detection name fixed.
EX:
FILE_ADS → HKTL_RADMIN.component
FILE_ATTR → WORM_DOWNAD.AD
- 1.3 Upgraded the Damage Cleanup Engine to version 7.5.1190 to address crashing issues during file cleaning.
- 1.4 Refined error messages related to USB access permission.
- 1.5 Resolved freezing issues with the Update Progress Dialog when STAgent is running in the background.

2. ST Agent:

- 2.1 Addressed failed STAgent installation on a system where MP (Management Program) had previously been installed.

Version 1.0.1034

Release date: 2024-06-13

Detail

New Features

1. Scanning Tool:

- 1.1 Supports VDS(Vulnerability Detection Service) asset information collection for Linux(ElementOne 1.0.10.1 and newer).
- 1.2 Safe Port users can use PI and PI Pro to collect Safe Port debug logs(Safe Port 1.0.1016 and newer).
- 1.3 Faster shutdown process of Scanning Tool.

Version 1.0.1032

Release date: 2024-06-13

Detail

New Features

1. Scanning Tool:

- 1.1 Updated the EULA

Version 1.0.1030

Release date: 2024-05-03

Detail

New Features

1. Scanning Tool:

- 1.1 Support syncing Portable Inspector engines and patterns to ElementOne via Safe Port. (Support from ElementOne 1.9.0 and Safe Port 1.0.1014)
- 1.2 Added error message for scanning tool being blocked by antivirus.
- 1.3 Added "scan_all" command line for the Linux platform.

Version 1.0.1028

Release date: 2024-03-27

Detail

New Features

1. Scanning Tool:

- 1.1 Support syncing Portable Inspector settings and logs to ElementOne via Safe Port. (Support from ElementOne 1.8.0 and Safe Port 1.0.1012)

Version 1.0.1026

Release date: 2024-03-07

Detail

New Features 1. RescueDisk:

- 1.1 Fixed failures in the Rescue Disk.
- #### 2. Scanning Tool:
- 2.1 Fixed the inability to collect the MAC address without an IP address set on the Linux platform.

Version 1.0.1024

Release date: 2024-02-29

Detail

New Features

1. ST Agent: Visual Studio will not be installed during the ST Agent installation process.

2. RescueDisk:

- 2.1 Fixed failures in the Rescue Disk due to missing boot files.
- 2.2 Fixed the Rescue Disk functionality to clean multiple files, by expanding the buffer limit.

3.Scanning Tool:

- 3.1 Updated the EN EULA.
- 3.2 Addressed the issue with starting the Scanning tool due to missing files.
- 3.3 Enhanced FTS with user-configured remote hosts.

Version 1.0.1022

Release date: 2024-01-03

Detail

New Features

1. Scanning Tool:

- 1.Fixed minor issue.

Version 1.0.1020

Release date: 2023-12-28

Detail

New Features

1. Scanning Tool:

- 1.Support for collecting Linux asset information(except installed KB and application list)
- 2.Fixed minor issue.

Version 1.0.1018

Release date: 2023-12-08

Detail

New Features

1. Modify JP wording.
-

Version 1.0.1016

Release date: 2023-11-29

Detail

New Features

1. Scanning Tool:

- 1.1 In ElementOne: Fixed the issue of incorrect Vulnerability Detection Service (VDS) due to Scanning Tool collecting Windows information.
 - 1.2 With Asset Info Collection enabled, resolved MAC address being empty in asset log and syslog when multiple network interfaces exist in Windows.
 - 1.3 With Asset Info Collection enabled, resolved MAC address being empty in asset log and syslog when using multiple IP addresses in a network interface configuration.
 - 1.4 Fixed truncated UI and adjusted UI layout.
 - 1.5 Fixed ST launching failure on the Linux platform.
-

Version 1.0.1014

Release date: 2023-10-06

Detail

New Features

1. Scanning Tool:
 - 1.1 Change the syslinux.exe upgrade path to prevent access denied error caused by GPO.
 - 1.2 Resolved issue of PI detected as a malicious binary by some AV engines.
-

Version 1.0.1012

Release date: 2023-09-15

Detail

New Features

1. Scanning Tool:

- 1.1 Fixed scanning tool unable to sync logs and settings with ElementOne.
 - 1.2 Fixed UI truncated in JP Management Program
-

Version 1.0.1010

Release date: 2023-08-14

Detail

New Features

1. Scanning Tool:

- 1.1 Fixed "Damage Cleanup Engine" cannot clean malware on Windows XP.
- 1.2 Modified scan specified path not allowed to be set as duplicate path.
- 1.3 JP language wording enhancement.
- 1.4 Removed Auto_run.inf to prevent Anti-malware from causing device upgrade failure.
- 1.5 Reduced the patch size for better user experience when updating the device.
- 1.6 Fixed several minor bugs.

2. Secure Storage:

- 2.1 The hidden file cannot be viewed and removed.
-

Version 1.0.1008

Release date: 2023-07-10

Detail

New Features

1. Scanning Tool:

- 1.1. Fixed the scanning tool cannot "syn log and setting" to ElementOne

Version 1.0.1006

Release date: 2023-06-08

Detail

New Features

1. Scanning Tool:

- 1.1. Enhanced malware detection mechanism on the Linux platform
- 1.2. Fixed an issue that occurred when activating Scanning Tools on ElementOne on the Linux platform

2. Secure Storage:

- 2.1. Enhanced malware detection mechanism
- 2.2. Fixed an issue that occurred when the user inputs an incorrect password

3. Support Tool: Fixed an issue that suppressed continuous updates for scanning tools

4. Management Program: Fixed a scanning result display issue on RescueDisk

5. Miscellaneous:

- 5.1. Fixed vulnerabilities
- 5.2 Added digital signatures to unsigned files

Version 1.0.1004

Release date: 2023-05-12

Detail

New Features

- Support to connect with ElementOne(1.0.1)
 - Fix an issue in Win 2000 & XP
 - Support to activate a Scanning Tool device by TXOne and Trend Micro license key
 - Support to display different EULA & logo based on different ACs
 - Security enhancements
-

Version 1.0.1000

Release date: 2023-04

Detail

Portable Inspector GM Release

- New UI layout
- Support to activate device by TXOne license key
