

Items	Descriptions
	7. Enter "quit" to exit the FTP client 8. Enter "exit" to exit the CMD 9. Delete the PE-in-zip.zip and text-file.zip files from the desktop. Download files over HTTP. 1. On the VM Win7, which should run on Host B, Launch the Internet Explorer (IE) browser from the taskbar.  2. IE will access the HFS web server automatically (Which runs on Host A). Alternatively, manually go to: http://192.168.23.196  3. Click on the "Training" web folder. 

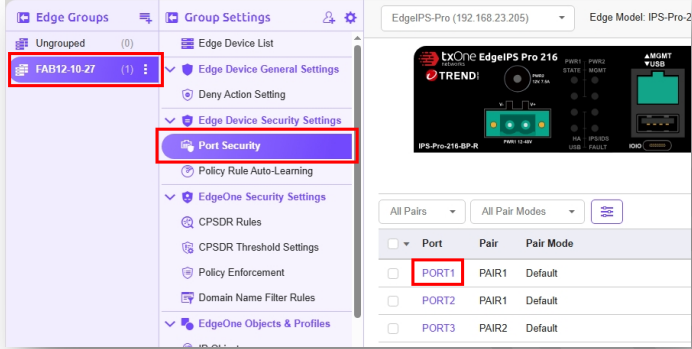

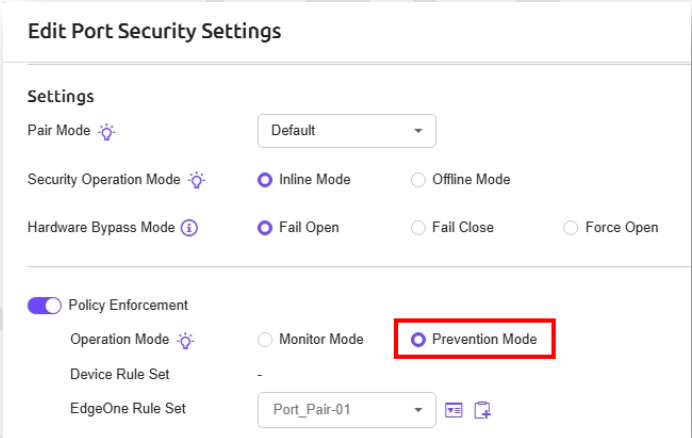

Items	Descriptions
	4. Download PE-in-zip.zip, text-file.txt and store the files on desktop.  5. To download the text file, right click it and choose “Save Target As...”  6. Check if the files successfully downloaded to the desktop or not.  7. Close the IE browser. 8. Delete the PE-in-zip.zip and text-file.txt from the desktop. 9. This step was simply to observe the system's behavior without EdgeIPS Pro 216 in the connection.

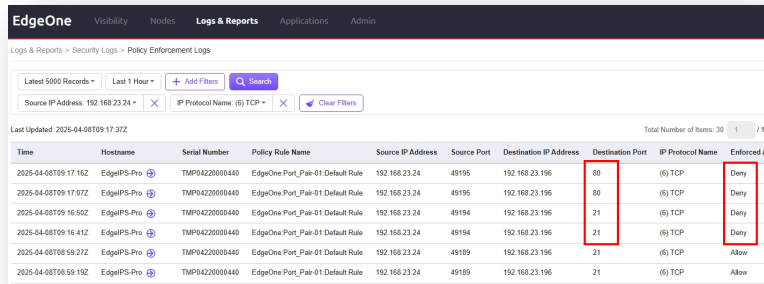

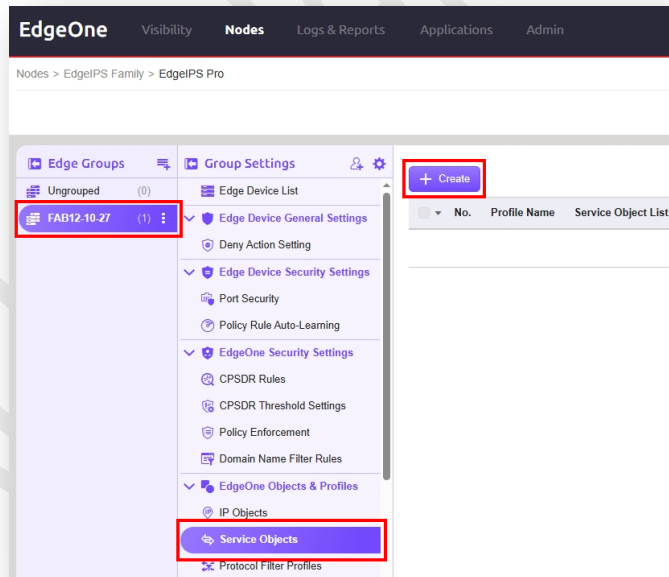

Items	Descriptions
	Monitor Mode versus Prevention Mode Objective : 1. Demonstrate FTP and HTTP access are functional under Monitor Mode. 2. Demonstrate that, after switching to Prevention Mode, access is blocked (Deny All) Steps: 1. Log in to the EdgeOne Web UI, go to https://192.168.23.21 or click the “EdgeOne” bookmark in Chrome. 2. Go to Node > EdgeIPS Family > EdgeIPS Pro 3. Select the Edge Group “FAB12-10-27” 4. Choose “Policy Enforcement” 5. Click “+ Create”  6. Create a Policy Enforcement Rule Set for Port pair1 Name: Port_Pair-01 Default Rule Action: Deny and Log  7. Click “Save”

Items	Descriptions
	8. Choose "Port Security" and click "Port1"  9. Configure the Port Security Settings - Security Operation Mode: Inline Mode - Hardware Bypass Mode: Fail Open - Policy Enforcement: Enabled - Operation Mode: Monitor Mode - EdgeOne Rule Set: Port_Pair-01  10. Click "Save"

Items	Descriptions
	11. Verify the Port Security configuration  12. Execute the “Download files over FTP” SOP. The files should be successfully downloaded by FTP. 13. Execute the “Download files over http” SOP. The files should be successfully downloaded over HTTP. 14. Go to Logs & Reports > Security Logs > Policy Enforcement Logs to check the logs.  15. You can apply event filters if you see too much “noise”. Click on the “Add Filter(s)” button. 

Items	Descriptions																																																																																																																																												
	16. Entry 1st filter Field: Source IP Address Operator: is Value: 192.168.23.24 17. Entry 2nd filter Field: IP Protocol Name Operator: is Value: (6) TCP Add Filters Add up to 10 filters to search for specific logs. In each filter you can include up to 10 search values. Field Source IP Address Operator is Value 192.168.23.24 Field IP Protocol Name Operator is Value (6) TCP 18. With the filters applied, the logs are easier to check. Items	Descriptions
	19. Go to Node > EdgeIPS Family > EdgeIPS Pro 20. Select the Edge Group “FAB12-10-27” 21. Choose Port Security 22. Click Port 1  23. Set Operation Mode to “Prevention Mode”  24. Remember to click “Save” to save the changes. 25. Execute the “Download files over FTP” SOP. The file download over FTP should Fail. 26. Execute the “Download files over http” SOP. The file download over http should Fail. 27. Go to Logs & Reports > Security Logs > Policy Enforcement Logs to check the logs. Hint: You can apply filter rules to filter the logs to find the result easier.

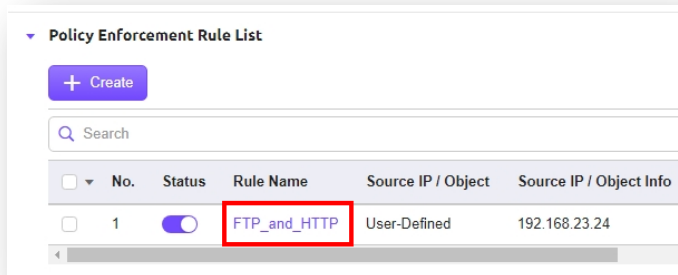

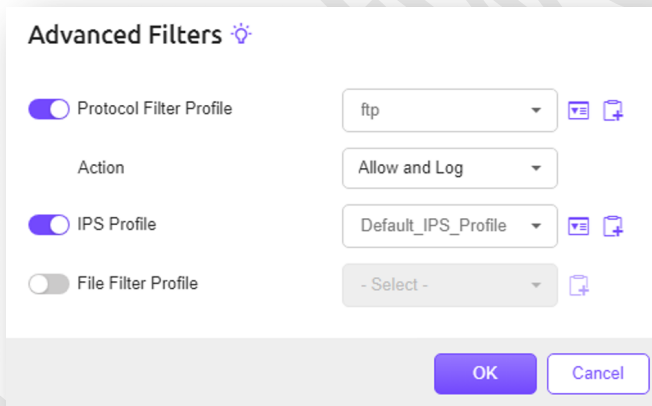

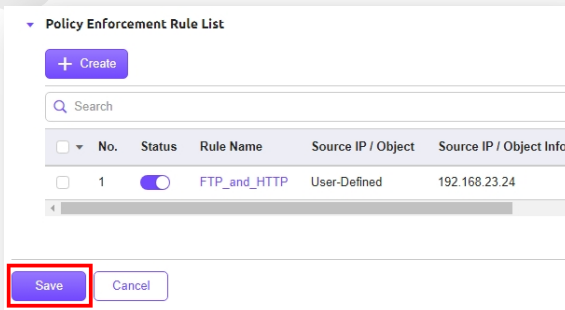

Items	Descriptions
	 Configure a “Basic filter rule” to allow ftp and http access. Create a “Service Object” for ftp and http - Go to Node > EdgeIPS Family > EdgeIPS Pro - Select the Edge Group “FAB12-10-27” - Choose the “Service Object” - Click “+ Create”  - Edit the Profile Name: FTP_and_HTTP - No1: Protocol: TCP, Service Port: Custom,80 ~ 80 - No2: Protocol: TCP, Service Port: Custom,20 ~ 21 - Click “Save”

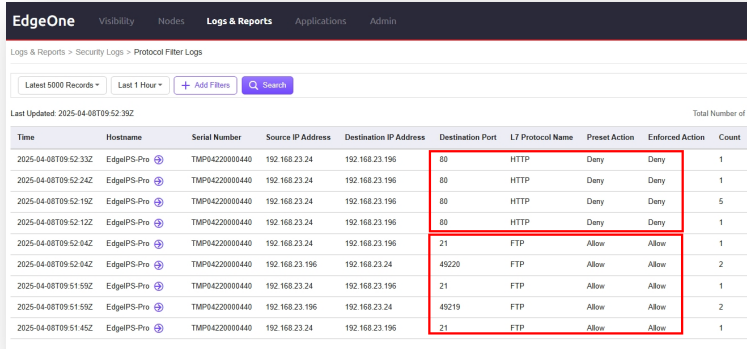

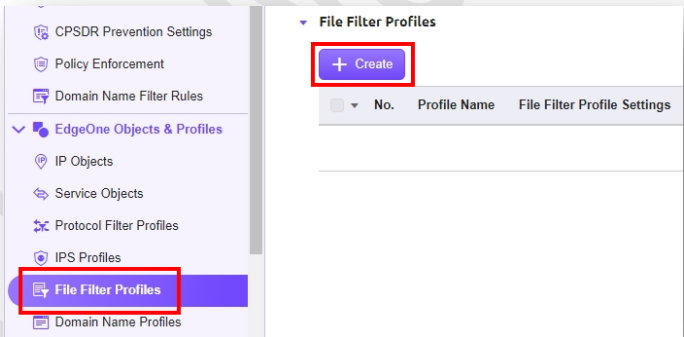

Items	Descriptions
	7. Choose the “Policy Enforcement” 8. Select the “Port_Pair-01” rule set 9. Click “+Create” 10. Rule Name: FTP_and_HTTP - Source IP / Single IP: 192.168.23.24 - Destination IP / Single IP: 192.168.23.196 - Service Object: Select “FTP_and_HTTP” - Action: Allow and Log 11. Click “OK”

Items	Descriptions
	12. Click “Save” to apply the policy. 13. Execute the “Download files over FTP” SOP. The file download over FTP should be successful. 14. Execute the “Download files over http” SOP. The file download over http should be successful. 15. Go to Logs & Reports > Security Logs > Policy Enforcement Logs to check the logs. Tips: You can add a search filter Rule Name:FTP_and_HTTP to make it easier to check the logs.
